

**Committee :** United Nations Framework Convention on Climate Change (UNFCCC)

**Topic :** Combatting Climate Change and Enhancing Environmental Resilience in Pakistan

### **Paragraph 1: Introduction (Background Information Regarding the Committee)**

The United Nations Framework Convention on Climate Change (UNFCCC) is a key international platform dedicated to addressing the impacts of climate change through global cooperation. The UNFCCC encourages member states to adopt strategies that reduce greenhouse gas emissions, adapt to climate impacts, and build environmental resilience. As a nation highly vulnerable to climate-related disasters, Pakistan is committed to contributing to the objectives of the UNFCCC and the Paris Agreement.

### **Paragraph 2: Topic and Country Relevance (Topic and Pakistan's Position-Relevance)**

Pakistan faces significant climate challenges, including frequent natural disasters such as floods, droughts, and heatwaves. These challenges threaten its agriculture-dependent economy, water resources, and ecosystems. To combat climate change, Pakistan has established ambitious targets to reduce greenhouse gas emissions, enhance afforestation, protect natural ecosystems, and improve water resource management. Sustainable development and increasing environmental resilience are national priorities. In alignment with the Paris Agreement, Pakistan has developed strategies such as the Nationally Determined Contributions (NDCs) to address these issues. The country also strongly advocates for global cooperation and joint efforts to combat climate change and its adverse effects.

### **Paragraph 3: Solutions and Conclusion**

Pakistan emphasizes the need for enhanced international support, including climate financing, technology transfer, and capacity-building, to achieve its climate goals. Initiatives such as the "Ten Billion Tree Tsunami" project and sustainable water management programs demonstrate Pakistan's commitment to mitigating climate impacts and protecting biodiversity. Pakistan urges the UNFCCC to prioritize actions that promote sustainable development, strengthen environmental resilience, and foster social cohesion. It stands ready to collaborate with other nations to achieve a sustainable, climate-resilient future for all.
