

Committee: UNSC (United Nations Security Council)

Topic: Israel-Palestine conflict

Country: Palestine

Delegate: Duru Alp

Palestine is the birthplace of Judaism and Christianity, and has been controlled by many powers and kingdoms. In modern times, the area was ruled by the Ottoman Empire, then the British Empire and since 1948 it has been divided into Israel, the West Bank and the Gaza Strip.

The current conflict between Israel and Palestine has caused many crimeless and innocent civilians including children and women to have their human rights violated. The protection of Palestinian civilians, especially children, from violence and human rights abuses is a matter of urgency. We cannot turn a blind eye to the suffering and injustice faced by innocent Palestinians caught in the crossfire of conflict. We must condemn all forms of violence and human rights abuses.. This includes implementing measures to ensure the safety and well-being of civilians, such as establishing safe zones and providing humanitarian assistance.

We think that we need to focus on topics such as the protection of civilians, implementation of a ceasefire agreement, the provision of financial aid to support refugees, the root causes of the conflict, the role of the neighboring countries, improving access to water, sanitation and healthcare in order to give sustainable solutions. As Palestine, we encourage all member states to work and collaborate with us for the peace and justice of both sides.
