

Position paper

Agenda Item: Israel-Palestine conflict

Country: Israel

Committee: UNSC

Israel seeks a just and lasting peace with the Palestinians. The conflict has a long history, marked by tensions between Jewish and Arab populations and the displacement of Palestinians after Israel's establishment in 1948.

Israel believes both sides have the right to peace and security. We are committed to negotiating on all final status issues, including borders, security, refugees, and Jerusalem.

Israel wants peace with the Palestinians. We believe that both sides should recognize each other and respect each other's right to live in peace and security. We urge the Palestinians to return to negotiations so that we can work together towards a peaceful future.
