POSITION PAPER

Germany is a European country that is located in Central Europe,its main livehood being forestry,fishing and agriculture.Germany is well-known as being strong in military,and having modern tourism.Germanys educational system is strictly excellent as well as having highly strong cybersecurity.

Our agenda item is "Addressing the growing threat to cybersecurity".Germany holds a strong,secure cybersecurity,Although even Germany has a secured cybersecurity,Germany values to take cautions for any upcoming dangers,as it highly values its humans.

In 2023,because of cybercrimes such as phishing links,spywares and untrusthy wares,Companies in germany lost 205.9 billion euros to cybercrime because of unhandled cybersecurity,affecting the companies.Because of these,Germany has taken acts in the past to not see more of these in future,creating laws and specific sectors.

As we are Germany,We approve some of our ideal solutions,such as Strengthening laws,spreading awareness to society,educating people about cybersecurity snd cybercrimes,And scanning any suspected wares that create dangers for humanity,The UN will be noting about these,taking information and advices.Germany expects the UN Security counsil will look forward to prevent any discomforts about cybersecurity,creating a safer environment for everbody.

Thank you for listening,
