

## POSITION PAPER

Country:Spain

Committee:UNFPA

Topic: Global Health Strategies For Combating Infant/Child Mortality

In the beginning of Spain's crisis,Spain made a universal system for healthcare 90 infants get treatments from various kinds such as pneumonia,asthma and more.Even though Spain had done so good,it still was in a crisis.

In the country of Spain ,maternal and Child Healthcare services were also a big help to save them from their crisis .In these services there were antenatal care,skilled birth attendants and more,Spain made also immunization and vaccinations programs to help the infants and children who were in need of sickness treatments .Spain's health are provides care for poisoning ,fractures and sprains .Spain also provides for physical sicknesses from birth such as Down syndrome ,sickel cell disease and more.

At Model United Nations we ask to get help from member and neighboring countries to save Spain from having their children killed.

Thank you.
