

THE POSITION OF THE STATE OF QATAR ABOUT PROMOTING GREEN JOBS AND TRANSITIONING INTO A GREEN ECONOMY

Country: State Of Qatar Committee: ECOSOC Delegate: Sarp Yusuf

Agenda Item: Promoting Green Jobs and the Transition to a Green Economy

The transitioning to a “greener economy”, promoting of green jobs and active recycling are seen as very important in recent times therefore most of the World argues that it should be constantly backed by the UN and that it should be a priority of the leading nations.

One of the reasons is that the carbon emissions have gotten too severe and it is actively harming the environment .

Another reason is the pollution caused by the emissions and the rising scarcity of fresh air and fresh water supplies.

As the delegation of the State Of Qatar, we have been working towards transitioning into a greener economy by increasing the usage of solar energy by working with QatarEnergy, reducing carbon emissions by reducing the carbon intensity of the LNG facilities around the country and we are further investing 2.5 billion USD to fund greener and more environment friendly projects.

As the delegation of the State of Qatar, we will work with the other delegates to further improve the investments and the green projects in our state and all around the World. We will be ready to invest in any projects outside of the State Of Qatar if it is seen necessary .
