

The Republic of Bulgaria

Country: Republic of Bulgaria

Committee: LEGAL 1

Agenda Item: Developing International Legal Frameworks for the Use of Artificial Intelligence

Artificial Intelligence (AI) is becoming very important in the world. AI can help us with many things, like making better decisions, improving healthcare, and supporting education. But there are also problems with

AI. Sometimes, it can make mistakes, invade people's privacy, or be used for harm.

Bulgaria believes that we need international rules for AI. These rules will make sure AI is safe and fair for everyone. Bulgaria supports working with other countries to make these rules. The rules should focus on:

1. Safety: AI should not harm people.
2. Fairness: AI should not treat people unfairly.
3. Privacy: AI should protect people's personal information.

Bulgaria thinks it is important for countries to share ideas and learn from each other. We need strong global cooperation to create clear laws for AI. Bulgaria is ready to work with all countries in the Legal Committee to make AI safe and helpful for everyone.
