

Distinguished secretariat,

Firstly, as South Africa , we are profoundly delighted and proud to be participating in this prestigious meeting.

Our ultimate purpose is to collaborate with the participating countries of the committee in order to solve the general problems of chemical weapons and finalize their existence ultimately.

As one of our solution ideas we would like to point that, our main and most important point to indicate is to form an agreement that will ensure that all countries that still has not done it will abandon their chemical weapon inventory once and for all. In addition to this, countries that agreed and signed on the CWC has to assure others that they are %100 certain and they do not possess any chemical weapons.

Furthermore, we strongly believe that when assembled as the whole world, there is nothing that we can overcome of. As South Africa, we are looking forward discuss further about our concerns and solutions in the official meeting.

Sincerely, the delegate of South Africa.
